

Cumulative 3+ years of field-based environmental research & protection
Proficient in biological process modeling & data science (Python, R, MATLAB, COMSOL)
Skillful in scientific communication, conversational Spanish language abilities

WORK EXPERIENCE

Part-Time Roles | Philadelphia, PA | Aug 2025 - Present

- Computer Science Tutor, after-school program at Overbrook HS (TechCORE2)
- Market Associate & Temp Market Manager (Rittenhouse Farmers Market)
- Bike Delivery Courier (Insomnia Cookies)

Research Technician | Soil & Water Lab, Cornell University, Ithaca, NY | Oct 2022 - May 2025

Part-Time, Seasonal

- Monitored pesticide leaching with NYS Department of Environmental Conservation
 - Tested 50+ surface/groundwater sites for contamination from 80+ pesticides
 - Developed hydrogeological models to predict future leaching in Python
 - Co-authored annual reports, presentations, and journal publication (pending)
- Built lab website in WordPress – <https://soilandwaterlab.cornell.edu/>

Grower Department Intern | Costa Farms, Miami, FL | June - Aug 2023

- Investigated the efficacy of four controlled-release fertilizers in outdoor plants
 - Oversaw 450+ potted plant experiments – setup, monitoring, data collection
 - Found key statistical insights on fertilizer performance in R

Wastewater Intern | Wastewater Treatment Plant, Hastings, MI | June - Aug 2022

- Ran daily lab tests on influent/effluent water (CBOD, coliforms, T/VSS, etc)
 - Assisted team with equipment management and on-call sewer maintenance
-

EDUCATION & CERTIFICATIONS

Biological Engineering, B.Sc. | Cornell University, 2024

- Study abroad - Fall 2023, Universidad de Cantabria, Santander, Spain

Level 1 Freediver | Freediving Instructors International, 2023

- Recreational freediving in fresh- / marine waters, ~20 meter depth
-

PUBLICATIONS & REPORTS

Testing of a Reimagined Pesticide Leaching Index Based on Preferential Flow Theory

Under Review

- Contributing author / developer of research approach

Water Quality Monitoring for Pesticides in Upstate NY - 2023 Annual Report

Submitted October 2024 to NYS Department of Environmental Conservation

- Primary section author on machine learning use for pesticide leaching prediction
